By School

Heritage Clean-up (Chilanchi Stupa)

Rally for Awareness

Community Cleaning Program

Introduction

At Gorakhnath Secondary School, a quiet transformation is taking root — and it's being led by the students themselves. Following the introduction of the NSET-UNICEF Safe School Programme, students came together to form an eco-club in 2081 BS. Their mission? To reduce plastic waste and create a cleaner, healthier learning environment for everyone.

Before the club began its activities, students received a hands-on orientation from a trained NSET volunteer.

Disaster Resilient Communities in Nepal

Heritage cleanup

Students of Shree Gorakhnath Secondary School were seen at the Chilanko Stupa of Kirtipur. Students from the eco club were seen at the heritage site, full of energy, using gloves and the dustbins provided by the project for the clean-up campaign.

Rally for Awareness

On June 5, 2025, students actively participated in a rally program to mark World Environment Day, raising awareness about the harmful effects of plastic waste. With banners, placards, and a strong message, they marched through the community, encouraging others to reduce, reuse, and refuse plastic, echoing this year's global slogan, "Our Land. Our Future."

Community Cleanup

Equipped with dustbins, gloves, and masks provided, students have taken charge of waste management in the community. They separate garbage, manage collection, and spread awareness among the people about the importance of reducing, reusing, and recycling.
